

Superintendent's Column

by Kim Cox
Superintendent of Schools

What a great homecoming weekend! There was a lot of action in Le Roy. I hope you were able to check out "Friday Morning Lights" on 13 Wham News. It was a great testament to our wonderful community and spectacular students. If you missed the show, you can capture the highlights at www.13Wham.com.

Many people have asked about the Rochester Gas and Electric project at the corner of Wolcott and Trigon. This is a safety and compliance repair they are doing on Village property. RG&E had hoped to complete the project this summer, but was held up by roadwork. Originally they were thinking that this would take about 2-3 weeks, but as you can see it has gone a bit longer. They expect completion within a week or so. Thank you for your patience. Our students have done a wonderful job following the detour signs and being mindful of their surroundings.

At Tuesday night's Board meeting, the Le Roy Board of Education approved the resolution for the Capital Improvement Project, known as the "R.I.T.E." Project. We will ask the community to vote on this 12.7 million dollar project on Wednesday, December 3, 2014, 7 am-9 pm at the Trigon Gymnasium hallway. A project information Open House will be held on **Wednesday, October 29, 2014, 6 pm-8 pm**, in the Wolcott Street School Cafeteria. This will feature a visual display of the areas proposed for improvement. Architects, engineers, administrators, and Board of Education members will be available to answer questions. We hope that you will stop by and see firsthand the scope of this exciting project. Remember to visit our website at www.leroycsd.org and click on the **R.I.T.E. Project** for more information.

Don't forget the **Fall Fest, Sunday, October 19th** at Trigon Park! Hope to see you there!
